教授

In this talk I introduce the Open Multilingual Wordnet, a large lexical network of words grouped into concepts and linked by typed semantic relations. The talk will cover how the resource has evolved over time (increases in both size and complexity) and introduce some of the latest extensions. Finally, I will discuss its use in sentiment analysis.

May 24, Tuesday

17:30 - 19:30

Online (via Zoom)

Language: English, Japanese
